CERTIFICATE No. 0161/3134/13

AITEX, Notified Body No 0161 for the application of Directive 89/686/EEC of 21st December 1989 (O.G.E.C. of 30.12.1989), Royal Decree 1407/1992 of 20th November, in which the minimum requirements that Personal Protective Equipment (PPE) must comply with are set forth.

CERTIFIES:

The Company: JGM INTERNATIONAL
STANFORD HOUSE, STANFORD TUCK
GB-NR28074 NORTH WALSHAM,
NORFOLK - UNITED KINGDOM

Has obtained **EC TYPE EXAMINATION INSPECTION CERTIFICATION**, in compliance with what is stated in Directive 89/686/EEC and in agreement with the applicable test procedures according to standards *UNE-EN 420:2004+A1:2010+ERRATUM 2011* general requirements and *UNE-EN 388:2004* mechanical risks of abrasion (Level 4), blade cut (Level 2), tears (Level 4) and puncture (Level 3) and *UNE-EN 511:2006* against risks of convective cold (Level 2), contact cold (Level 2) and water penetration (Level 0), having attained the levels of provision specified in **TEST REPORT N°2013EP0712** and in **PPE's TECHNICAL DOCUMENTATION**.

Said certification is valid for the following articles:

PPE TYPE "GLOVE MODEL FG670" destined to the protection of the user palm against mechanical risks of abrasion, blade cut, tear, puncture, and to the protection of the whole hand of the user against convective and contact cold risks.

Manufactured by: JGM INTERNATIONAL

PPE DESCRIPTION:

Five-fingered glove formed by different pieces stitched together to form a palm, back and cuff. The palm is formed from two pieces of grained leather in black. The finger tips are coated in red rubber and the centre of the palm is covered in blue leather. The back is formed by a black woven and black knitted material and pieces of black and grey grained leather at the ends of the ring and small finger. The thumb has a piece of black grained leather at the end. Near the seam between the palm and the back, along the index finger is a red embroidered logo reading "Flexitog". The cuff is formed from a black woven material joined to the palm by a horizontal seam. The cuff is bordered in a woven material with black coating and inside has a strap for adjustment which locks with a sliding lock. The inside is elastic, which puckers the material. The glove has two plastic attachments, a strip of black material adjustable via a plastic buckle and a plastic snap button near the little finger on the seam between the back and the palm. The glove is lined in black knitted material and an identification label is attached to the seam between the palm and the back.
